Figure 1 is a cross-sectional view of a circular device, likely a pump or motor. The device features a central rotor assembly (10) with a central shaft (10a) and a central hub (10b). The rotor is surrounded by a stator assembly (11) with a central hub (11a) and a stator body (11b). The stator body is equipped with a series of teeth (12) and a series of grooves (13). The rotor assembly includes a series of teeth (12a) and a series of grooves (12b). The device is sealed by a cover (14) and a base (15). The cover and base are equipped with a series of teeth (14a) and a series of grooves (14b). The device is shown in a cross-sectional view, revealing the internal components and the flow path of the fluid.
